## Weatherproof outdoor recliner mechanism range.

The Relax Outdoors mechanism range allows popular home recliner mechanisms to function outside. Each mechanism undergoes a treatment process to ensure weatherproofing, and each offers smooth transitions from all available resting positions. They are a compact, high-leg reclining mechanism featuring a hidden footrest that tucks under the seat for a stationary look. The slim profile is not only capable of motion but also has an ergonomic, well-balanced full-recline position that supports up to 350 lbs.
