

# InNova™ FREESTYLE™ Central-Driven Ottoman

High-Leg

## Creatively engineered free-from-view central-driven ottoman linkages

InNova™ Freestyle™ is a NEW, imaginative and creative power-motion mechanism that combines the revolutionary technology of InNova with central-driven ottoman functionality.

The InNova™ Freestyle™ mechanism requires no manual parts and can support 158 kg (350 lbs.) effortlessly, while making the operation smoother and more responsive.

Patent-pending technology.

**InNova Freestyle**, creatively changing the wood-to-the-floor power motion furniture mechanism industry.

Freestyle linkages are free from view. The traditional side linkage appearance has been replaced with an innovative design in which the links are located in the center of the mechanism.

Power-motion furniture has rapidly become the fastest-growing product sector in the furniture industry today, and Leggett & Platt is proud to present this latest product innovation to the market.

The InNova Freestyle is designed with power only in mind. Eliminating unrequired manual parts from the mechanism allows the product to become more streamlined and more responsive in the open and closed functionality.

### Attributes include:

- Effortless motion for easy operation by all ages
- Easy action to Full-Recline position

### Key Features & Benefits

- Centrally positioned, the ottoman linkages are concealed from view, with no compromise to the mechanism's overall stability
- Power-only mechanism
- Faster-engaging response time compared to other wood-to-the-floor mechanisms\*
- Tested at 158 kg (350 lbs.) weight capacity
- Accommodates leg heights of 50.8 mm (2-inch) - 152.4 mm (6-inch) while concealing the mechanism from view
- Flipper ottoman for high-leg applications only allows for outstanding additional 2 inches (50.8 mm in CAD) of leg rest extension support
- New compact power motor. No tools required to install motor
- Headrest options: Contempo™ Independent Headrest, Perfecto™ Articulating Headrest, and VersaTilt™ Articulating Headrest

\*Compared to previous and current InNova models.
