

Lift Recline (One-Motor)

5442 (One-Motor Lift)

## 300 lbs. weight capacity mechanism with lift and reclining capabilities.

Simply press the "up" button to raise the chair to the TV Position and then, if desired, to the Fully Lifted Position. To return the seat to either the TV or Full-Recline Position, press the "down" button.

**Power Series – Lift-Recline** is a strong, robust, near-Zero Wall lift chair mechanism that has been tested to support a 300 lbs. weight capacity.

*Attributes include:*

- Maximum seat elevation with superb stability from Full-Recline to Full-Lift position
- The ultimate in reclining chairs with near-Zero-Wall capability
- Easy-to-use power motion controls – fingertip motor control with infinite recline positions
- Smooth and quiet operation

### Key Features & Benefits

- Dependable one-motor operation
- Maintenance-free direct low-voltage motor – 24-volt, UL-approved
- K.D. back systems are available for easy back removal for handling
- Tested to 300 lbs. maximum weight capacity
- Spring-loaded ottoman option
- Long Life™ mechanism has been field-tested and proven by L&P's testing facility
- Wide-stance construction provides greater side-to-side stability
- Fits same frame as manual Zero-Wall, glider, or rocker
- Durable steel base and cross supports
