

# InNova™

Be expressive.

Wood-to-the-Floor mechanism

Sleek, low-profile recliner mechanism adaptable for high-, mid-, and low-leg sofas, love seats, and chairs.

The InNova™ recliner mechanism is a sleek, modern motion furniture mechanism, specifically designed for contemporary furniture designers who enjoy the sense of being creatively free.

Perfect posture, balance, and performance for contemporary high-, mid-, and low-leg sofa, love seat, and chair applications.

### The latest wood-to-the-floor product innovation from Leggett & Platt, the InNova™ recliner mechanism.

This outstanding motion furniture mechanism has been creatively designed with contemporary furniture designers in mind.

InNova provides better comfort, durability, and quality than ever before, with the ability to be installed within leg heights of 2 inches (without flipper Ottoman) to 6 inches (with flipper Ottoman).

InNova is the perfect mechanism for furniture designers.

#### Attributes include:

- Effortless motion for easy operation by all ages
- Easy action to full-recline position
- Sleek, low-profile mechanism
- Optional independently driven motorized headrest available

### Key Features & Benefits

- 40% greater weight capacity – 350 lbs
- Accommodates leg heights of 2 inches (50.8 mm) – 6 inches (152.4 mm)
- Flipper Ottoman for high-leg applications only; allows for outstanding additional leg extension support
- Available in manual or power
- Dual headrest operation – manual and power
- More layout in the full-recline position than previous models

\*Alternative Mid & Low-Leg InNova mechanisms are available on request; please contact a Leggett & Platt representative for further details.
